

Assortiment - Lock Plates

Are your doors fire safe?

Fire-resistant lock plates ensure that the transfer to an adjoining room is optimally delayed in the event of a fire. That is why the use of lock plates in doors and other hinges or locks is an essential component in making buildings fire-resistant.

Our wide range of lock plates means that we have suitable lock plates for the large locksmiths such as NEMEF, BUVA and LIPS. If the size you are looking for is not included, please contact us.
