

## Assortiment - Packs

### How do you optimally seal hangings and locks in the event of a fire?

In case of fire it is very important that parts such as lock cases, hinge leaves or other metal parts are covered with expanding materials. With the aim of optimally sealing seams and cracks so that oxygen has as little access as possible to the combustion process. Within our assortment of sets for hinges and locks you can find a suitable set for almost every lock or hinge.
